DUAL DISK NETWORK HARD DRIVE / 3.5" / STORAGE SERVER /
BACKUP SERVER / EMAIL SERVER / ROUTER / AND MORE
WIN & MAC & LINUX

Freecom DataTank Gateway WLAN

- **Network Attached Storage;** add storage capacity to your network in seconds
- **Dual disk;** configurable as RAID 0 (fast) or RAID 1 (safe)
- **Gigabit Ethernet;** for high speed network connection
- **WLAN connection;** for wireless access to the DataTank Gateway
- **File server;** fast central data location for all your PCs or network
- **Backup server;** automatic backups for securing all your data
- **Web server;** get your files online and control them yourself fast and easy
- **FTP server;** access your secured data from all over the internet
- **Network router;** connect your PCs and notebooks simultaneously to internet
- **USB server;** add additional USB hard drives and USB sticks to your network
- **USB print server;** add your USB printer and create a network printer
- **AV media server;** central location for all your audio and video files
- **Firewall;** keeps personal data in and hackers out

- ID2 ready and cross-platform compatible with Windows, Mac, Linux and Unix
- Aluminium enclosure with heat controlled fan speed and low noise through managed HDD spin down
- Cost effective SOHO server replacement (your PC not required to be on)
- Includes Kensington hardware security slot
- Winner of the iF Product Design Award 2007 for outstanding design!
- 2 years manufacturer's warranty and unlimited free helpdesk support

The all in one network storage solution.

The DataTank Gateway WLAN from Freecom Technologies offers an easy and fast way to add network storage in the office or home environment. Quick and simple installation allows you to instantly store and share music, videos, images and other files via your web browser. Using the integrated router you can share the Gateway in seconds. With the 2 extra USB 2.0 Host ports you can use your standard USB printer as a Network printer and also add extra hard drives or other storage devices to increase the network storage capacity quickly.

Thanks to the router function sharing internet is as easy as can be: just plug your DSL modem in the WAN port and have instant access to internet from every computer in your network.

Simple setup and endless possibilities make the Gateway the perfect solution for your home and small office. The DataTank Gateway WLAN replaces many other devices and is designed to setup easily without network administrator knowledge.

Free your mind!

Freecom DataTank Gateway WLAN - Ideal for home and office use

What can the Freecom DataTank Gateway do for YOU, at home ?

Small home networks are a common thing these days. The number of computers per household is growing. Thereby, the amount of data accumulated is growing simultaneously. Wouldn't it be easy if all this data is stored on one central location, so that users within the home network can always access it, no matter which PC or notebook they use at that moment? And wouldn't it be even better if you could securely access this same data through the Internet? Imagine visiting relatives at the other end of the world, logging on to your DataTank Gateway located at your home, and showing them the latest pictures of your family....

Freecom makes it all happen! The DataTank Gateway offers you the possibility to store your data centrally, access it from inside and outside (securely!) your network. That's not all however. The DataTank Gateway is so much more than "just another network hard drive". With the DataTank Gateway, you can turn your USB Printer into a network printer, so all users within your network can use this printer. The DataTank Gateway is also a WLAN access point, router, fileserver, webserver, ftp server, media server... the possibilities are endless! Free your mind!

What can the Freecom DataTank Gateway do for YOU, at the office ?

The Freecom DataTank Gateway can become the center of your small office network. Users are connected to the DataTank either wirelessly or via network cable. Internet access also goes through the DataTank Gateway; just connect the DSL or cable modem to it, and anyone from within your network can access the internet.

These days, flexible working spaces (either at the office or working from home) are becoming a common thing in the fast business world. With the DataTank Gateway as your data-center, it does not matter where your users are. From inside or outside (via the internet, securely of course) they can connect to the DataTank Gateway and access the files they need.

The DataTank Gateway can also be used to host your own website, as an e-mail server, a FTP or HTTP server..... for every business and every user-scenario, the DataTank Gateway offers a tailor-made solution. All this at a price that is much lower than your average fileserver.

Cost effective, secure, multi-talented... that's the Freecom DataTank Gateway. Endless possibilities! Free your mind!

Hard drive

The DataTank Gateway has 2 harddrives inside, which you can easily configure as one volume (RAID 0), or in safe mode (RAID 1), where one drive automatically makes a backup copy on the other. The hard drive is assembled in an aluminium enclosure with heat controlled fan speed and is low noise through managed HDD spin down. Additional hard drives can easily be attached using the USB 2.0 port of the DataTank Gateway.

File server

The DataTank Gateway can be used as a file server. It can be your worry free, fast central data location for all your PCs or network. Easily connected via the LAN or WLAN interface of the unit. Sharing data, presentations or private documents has never been so easy.

Backup server

Protect all your files using the DataTank Gateway as your backup unit by using the internal hard drive or by connecting additional storage devices such as hard drives to the unit using the SATA or USB 2.0 interface.

Web server

The DataTank Gateway can be used as a web server to access your files online and control them yourself fast and easily from anywhere in the world. Using DSL you can even host your companies website on the DataTank Gateway.

FTP server

Reach your secured data from all over the internet using the DataTank Gateway as an FTP server. Access your presentations, office documents and multi media files (movies, music, pictures etc.) from any location or share them with others.

Network router

Using the integrated router you can share the Gateway in seconds. Thanks to this function, sharing internet is as easy as can be: Just plug your DSL modem in the WAN port and have instant access to internet from every computer in your network.

USB print server

With the 2 extra USB 2.0 Host ports you can use your standard USB printer as a Network printer and also add extra USB devices to your network easily. You can also share your other devices such as hard drives and flash memory.

AV server

Use the DataTank Gateway as your AV server, the central location for all your audio and video files. Your kids can watch videos stored on the DataTank Gateway while you are listening to music from the same device.

Firewall

The DataTank Gateway comes with an integrated Firewall, which keeps your personal data in and hackers out. Easily manageable, the Firewall is the protection for your private, personal and shared data.
