

STILL ONE OF THE MOST USED MEDIA TYPES IN THE WORLD

Nowadays, most computers and notebooks are shipped without a floppy drive. However, the need for a floppy drive still exists; the old, trustworthy 3.5" floppy disk is still one of the most used media types in the world. Small files like drivers, software updates, patches for operating systems, anti-virus updates and boot-diskettes are still being shipped on floppy disks.

Also, a lot of people still have old text files, spreadsheets, pictures etc saved on floppy disks. So there will always come a time when you need a floppy drive for a software update, to access some of your old data, or you need a diskette to quickly save a small file on. The new Freecom External USB Floppy Drive is all that you need. Affordable, easy to use, lightweight: very portable and very convenient. Installing the USB floppy drive could not be easier: Just plug it into the USB port of your computer and you're ready to go!

The Freecom External USB Floppy Drive is also a very cost-effective replacement for when your existing floppy drive is broken. Powered through your USB port, this USB floppy drive gets you up and running in seconds. Keep it simple!

FREECOM USB FLOPPY DISK DRIVE

TRAVEL BACK IN TIME

Most notebooks and netbooks are not equipped with a floppy drive these days, but many companies still work with trustworthy floppy disks. Maybe you still even have your floppy collection from the old days? Freecom offers an ideal solution - simply connect Freecom's Floppy Drive to your notebook or netbook via USB to access your files.

GET THE JOB DONE

Floppy disks are still often used in the automotive industry, within government organisations, and by system administrators as well as millions of home users. Freecom's Floppy Disk Drive gets the job done.

EASY AS 1, 2, 3 WITH USB

Simply connect Freecom's Floppy Disk Drive via USB cable to your notebook and review the files on your floppy drives. What's more, with its slimline design, the drive is easy to carry around.
