Capture HD Gameplay
up to 1080p

Design for Console and
PC Games

HDMI, Component and
VGA Inputs

Real-time HD H.264
Recording

If you're a hardcore Xbox 360, PS3 and PC gamer, you now have a must-have gadget, which can stop your steps for searching a perfect solution to achieving your in-game footages. The Game Broadcaster HD is a 1080p HD video capture card dedicatedly designed for video and PC games. It can meet your need with the on-board VGA and HDMI inputs.

The accompanying Component to VGA Cable saves you from the trouble of preserving games which are "imprisoned" by content protection techniques. Plus, the Game Broadcaster HD supports various graphics card resolution and allows you to capture the most detailed activities in a virtual battlefield on another PC.

The Game Broadcaster HD comes with the RECentral software, whose intuitive user interface makes recording and live streaming game footages easier than ever. With just a few quick and easy steps, you can stream to the pre-set channel with out hassles. Besides, the Game Broadcaster HD is fully compliant with the leading Adobe Flash Media Live Encoder, XSplit and Wirecast. It's a perfect mate for professional and amateur casters.

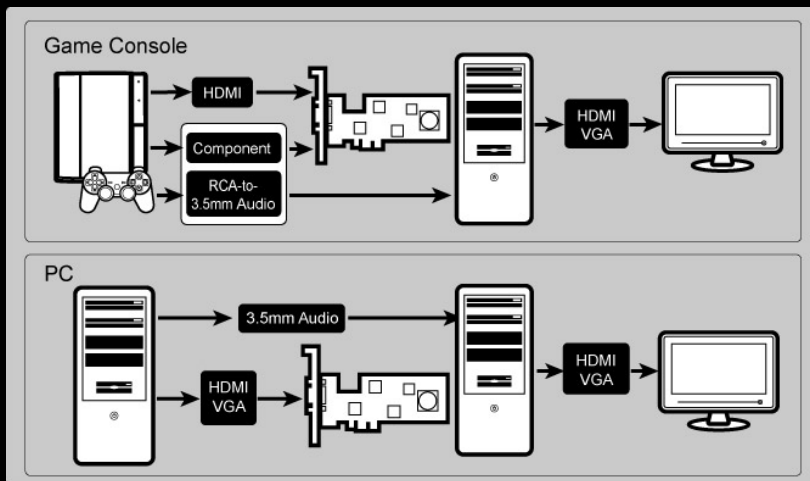

VGA/Component and HDMI inputs
increase the flexibility
